# INTRODUCTION

---

Although the Sector of Agriculture and Food Processing Industry is not the strongest and most successful industry and export sector, it has a high GDP share and a significant share in BH. export.

This industry has the export potential for specific products in niche markets. Specific products that B&H can offer are: fruits and vegetables, meat and meat products, milk and dairy products, fish, honey, medicinal and aromatic plants and secondary forest fruits, alcoholic and non-alcoholic beverages.

In recent years, the Food Industry is developing thanks to the Strategy that relates to intensification of crop and animal production, support to revitalization of the food processing industry, development of organic production, and application of principles to protect the environment, improvement of the usage and protection of genetic resources in agriculture, support to modernization and the introduction of European and world standards in agricultural production and processing, improvement to the professional education and skills of agricultural producers and food processors, development of vertical and horizontal integration by strengthening of market infrastructure and development of financial sources for the agricultural sector.

Due to increased competitiveness of the Food Processing Industry, the export rate in recent years has been increased by 30%. On the demand side, there is considerable scope for increasing export, both in terms of geography and in terms of export production diversification.

Why import from or invest in Food Processing Sector in Bosnia and Herzegovina?

- Skilled, motivated and affordable labor force;
- Geographical location and closeness to the EU market;
- Experience of food processing companies in exporting to the EU market, the Gulf States, Asia, USA and Australia;
- Abundance of production facilities, industrial zones and available production capacities;
- No restrictions for foreign partnership with domestic companies;
- Regional and bilateral Free Trade Agreements;
- Stable currency pegged to Euro;
- Low inflation;

## Export of Agriculture and Food Processing Industry (2009-2014)
