### Organisation Details

A dental clinic from Belgrade, Serbia offers to its clients a full array of dental services, with special focus on oral surgery, implantology, regeneration in dental implantology, and periodontology and prosthetics (CAD/CAM - Computer-aided design/Computer-aided manufacture). Their dental practice is equipped with only the latest and most advanced technologies which distinguish them from most of the competition. This includes the latest generation X ray machine, the apex locator, intraoral camera, digital records, etc.

Besides the dental services, the clinic is offering a complementary service - complete organization of staying in and visiting Belgrade to its patients coming from abroad (dental tourism). Therefore, the company is offering taking care of any dental needs at the most competitive available prices and enabling clients to truly experience Serbia, and especially Belgrade, as a leading tourist destination of this region. Recognizing the potential for expansion brought about by recent trends in dental tourism they have become one of the first practices to offer full dental tourism services including transportation to and from: the airport, the hotel, and the practice, booking the hotel, organizing tourist visits/events in accordance with the dental services plan, and any other aspect of the patient's stay.

### Type of Cooperation

The dental clinic is looking for partners (agencies, representatives) that would provide them promotional services in their countries.

The potential business partners should provide them with promotional services such as advertising, promotion, and client-seeking in a defined territory for the whole array of dental tourism they provide. It could be agencies with experience in promoting dental and dental tourism services in the optimum manner.
