

ICT and Clean Technology Trade Mission

1. ADTRAN

Adtran is a leading global provider of open, disaggregated networking and communications solutions that enable voice, data, video and internet communications across any network infrastructure. From the cloud edge to the subscriber edge, ADTRAN empowers communications service providers around the world to manage and scale services that connect people, places and things. ADTRAN solutions are currently in use by service providers, private enterprises, government organizations and millions of individual users worldwide.

2. AerialZeus, LLC

AerialZeus specializes in the use of aerial intelligence for remote sensing. From mapping natural resources to environmental monitoring forests and inspecting critical infrastructure, its engineers and scientists leverage imagery from satellites, airplanes, drones, and terrestrial scanners. AerialZeus bases its strategic advice on quantifying problems via digitizing technologies. AerialZeus develops digital twins for multiple industries, from Pixels to Solutions.

3. Alpha Technologies

Alpha Technologies was founded in 2003 with a simple vision: provide world-class, industry-leading service to organizations of all sizes. Alpha grew exponentially over the last 20 years to become a leader in infrastructure services, winning multiple small business awards and successfully competing for government contracts that traditionally belong to larger companies. Unlike traditional Value-Added Resellers (VARs), Alpha abides by vendor-neutral principles which strengthen its commitment to achieving maximized value and quality for our customers. As a corporate core competency, Alpha provides federal agencies, state and local government, as well as commercial customers with information technology modernization solutions. Alpha boasts many certifications and credentials including as a Certified Cisco Network Associate, Advanced Collaboration Architecture Specialization, a 'blackbelt' collaboration pre-sales expert, multiple cloud/video collaborator endorsements. The staff at Alpha provide the company's true strength, with experience in all accepted/used coding languages, data/network engineers, CCIE, CCNP, CCNA, and many other data security, design, implementation, and operations credentials helping the company truly be an end-to-end partner. Its core capabilities are network design, wireless networks, 24x7x365 helpdesk, IaaS, colocation, hosting, data center consolidation, managed services, IT professional services

ICT and Clean Technology Trade Mission

4. Authentix

Authentix has a long history of providing effective authentication solutions to Fortune 500 and government customers. Formed in 2003, Authentix merged US-based Isotag and UK-based Biocode, combining two of the authentication industry's leading players. Authentix provides advanced authentication solutions for governments, central banks and commercial products, enabling local economies growth, banknote security to remain intact and robust market opportunities for commercial products. The company's mission is to safeguard the integrity of global commerce by delivering innovative authentication solutions.

5. Cisco

Cisco Systems, Inc. (Cisco) is a multinational technology conglomerate corporation that develops, manufactures, and sells networking hardware, software, telecommunications equipment and other high-technology services and products. Cisco provides IT products and services across five major technology areas including: networking (including ethernet, optical, wireless and mobility), security, collaboration (including voice, video, and data), data center, and the internet of things. Cisco's leading products include Webex, OpenDNS, Jabber, Duo Security, and Jasper.

6. CPS Tech Inc

CPS Tech is a global engineering and contract manufacturing company, versatile to any innovation environment. It provides product development through turnkey engineering of electrical, mechanical, and software. CPS Tech Inc. partners with leaders in automotive, consumer electronics, defense and aerospace, energy, healthcare and life sciences, industrial, semiconductor, telecommunications and wireless computing and data comm to provide manufacturing, global fulfillment and aftermarket services. Its products are compliant with ISO:9001, AS9100, Nadcap, ISO14001, IPC 610 Class II and III, and others for rapid prototypes and volume production. CPS Tech is the proven choice for product development and time to market success.

7. Dell Technologies

Dell is among the world's leading technology companies helping to transform people's lives with extraordinary capabilities. Its company motto is "We create technologies that drive human progress". The company provides customers with the industry's broadest and most innovative technology and services portfolio spanning from edge to core to cloud. Dell values its

ICT and Clean Technology Trade Mission

customers, winning together, innovation, results and integrity. Dell Technologies is employing more than 130,000 people globally. Revenue in FY 2022 was around 106B USD.

8. Excel Services Corporation

For over 37 years, EXCEL Services Corporation (EXCEL) has delivered innovative and value-added solutions to the most complex issues facing the global nuclear industry. EXCEL is ideally positioned to assist its clients to prepare for the challenges faced in the rapidly evolving industry – an industry that has been confronted with a range of issues, including regulatory challenges, economic pressures, and the constant vigilance required to defend against man-made threats and natural hazards. With deeper expertise and broader reach into solutions for operating safely, efficiently, and cost-effectively, EXCEL can create sustained value for energy producers, and for any client responsible for protecting critical infrastructure, managing and mitigating risks, and strengthening all aspects of operational excellence in an increasingly demanding environment.

9. Honeywell/Honeywell Process Solutions

Honeywell Process Solutions is a pioneer in automation control, instrumentation and services for the oil and gas; refining; energy; pulp and paper; industrial power generation; chemicals and petrochemicals; biofuels; life sciences; and metals, minerals, and mining industries. Honeywell plays a critical role across the entire lifecycle of an industrial facility, including project design and engineering, technology licensing, technical services, ongoing operations, cybersecurity, continuous modernization. A leader in digitization, Honeywell delivers software and services that help customers overcome competitive pressures and uncertain market conditions to achieve game-changing business outcomes.

10. Infinera

Infinera is revolutionizing telecommunications networks with innovative, industry-leading connectivity solutions including high-end subcomponent technology, systems for network infrastructure, automation software, and professional services. Infinera's mission is to lead in the era of open optical networking by leveraging deep vertical integration and innovation in optical semiconductor technologies to provide the most efficient and scalable high-speed connectivity solutions to help network operators cope with this deluge of capacity and offer new, innovative, and differentiated services. Infinera provides solutions, power networks, and services for leading network operators around the world, including Verizon, AT&T, Telstra, Telefónica, Telia Carrier, Liberty Global, Lumen, Facebook, and Netflix. Infinera serves

ICT and Clean Technology Trade Mission

leading enterprises, utility operators, and government agencies including the U.S. Department of Defense.

11. Integrated Biometrics

Integrated Biometrics (IB) uses its technologies to provide benefits of identification such as establishing voter registration, preventing fraud, facilitating financial inclusion, aiding healthcare accuracy and privacy. Working through local institutions, IB's FBI-certified scanners enable greater accessibility, convenience and safety in countries around the world. Founded in 2002, Integrated Biometrics is an alternative solution to the commonly used traditional optical and silicon fingerprint technologies. It continues to grow as a global provider of biometric solutions. Integrated Biometrics creates innovative, highly accurate applications in over 39 countries to help manage border protection and to establish and enforce customer identity in accordance with national and international standards worldwide.

12. International Business Machines (IBM)

IBM addresses the hybrid cloud and AI opportunity with a platform-centric approach, focused on providing two primary sources of client value – technology and business expertise. It provides integrated solutions and products that leverage: data, information technology, deep expertise in industries and business processes, with trust and security and a broad ecosystem of partners and alliances. Our hybrid cloud platform and AI technology and services capabilities support clients' digital transformations and help them engage with their customers and employees in new ways. These solutions draw from an industry-leading portfolio of capabilities in software, consulting services, and a deep incumbency in mission-critical systems, all bolstered by one of the world's leading research organizations.

13. Juniper

Juniper Networks is a multinational corporation that predominantly develops and markets networking products, including routers, switches, network management software, network security products, and software-defined networking technology. Juniper is a global leader in artificial intelligence networking, cloud, and connected security solutions, and provides an additional range of services – advisory, implementation, optimization, support, trainings, in education, energy and utilities, government, healthcare, media and entertainment, retail and other sectors.

14. Motorola Solutions Germany GmbH

ICT and Clean Technology Trade Mission

Motorola Solutions is a global leader in public safety and enterprise security. Our technologies in land mobile radio communications ("LMR" or "LMR Communications"), video security and access control and Command Center Software, bolstered by managed and support services, create an integrated technology ecosystem to help make communities safer and businesses stay productive and secure. We serve more than 100,000 public safety and commercial customers in over 100 countries, providing “purpose-built” solutions designed for their unique needs, and we have a rich heritage of innovation focusing on advancing global safety for more than 90 years.

15. NCR

NCR Corporation is a leader in transforming, connecting and running technology platforms for self-directed banking, stores and restaurants. NCR is headquartered in Atlanta, Ga., and has 38,000 employees globally with more than 5,000 working in Serbia. Serbian teams are recognized as efficient, experienced and innovative, which has made Serbia a strategic hub for NCR’s further business development and innovation. Encouraged by the excellent customer dedication and business results of Serbia-based employees, the company decided to strengthen its presence in the country with the construction of a state-of-the-art office. Belgrade Campus, opened in fall 2021, serves as a platform for further growth and transformation of NCR teams in Serbia.

16. Oracle

For more than four decades, Oracle has delivered innovation upon which entire industries have been built. With 170,000 employees and 430,000 customers in 175 countries, Oracle is one of the largest vendors in the enterprise IT market. Oracle’s mission is to help people see data in new ways, discover insights, unlock endless possibilities.

17. Pills2Me

Pills2Me is a pharmacist-founded pharmacy delivery service, using a software created to enable pick up of prescriptions from any pharmacy and their delivery to the customer. This company created an app with a purpose to improve overall healthcare, remove barriers to medication access and adherence, using IT solutions and providing expert advice especially to the most vulnerable groups.

18. Renhead

Renhead’s Vendor and Workforce Management software is designed to eliminate paperwork and streamline all aspects of your workforce. ONE simple-to-use platform covers all HR categories including sourcing, onboarding, and managing. Renhead’s founders understand the

ICT and Clean Technology Trade Mission

importance of time management, sustainable pipeline development, data integrity and flexibility, which is why Renhead's SaaS solution offers the most robust features to address today's complex workforce market challenges while providing scalability and flexibility to support future changes in the market.

19. Quantum Copper Inc

Quantum Copper is a new emerging supplier of high-performing copper connector with superior fire-retardant capability in the United States, and globally. The company's focus is the development of innovative solutions encompassing new technologies in separators, copper connector film using halogen free, environmentally friendly, fire-retardant polymers.

20. SAS

SAS Institute is a multinational developer of analytics software, which helps access, manage, analyze and report on data to aid in decision-making. Through innovative analytics and artificial intelligence, SAS empowers and inspires customers around the world, in nearly 150 countries to transform data into intelligence. SAS has its software installed at more than 80,400 business, government and university sites.

21. Schweitzer Engineering Laboratories Espana, S.L.U

Schweitzer Engineering Laboratories Espana, S.L.U (SEL) specializes in creating digital products and systems that protect, control, and automate power systems around the world. This technology prevents blackouts and improves power system reliability and safety at a reduced cost. With designing and manufacturing reliable, high-quality products, SEL also operates in research, design, building, testing, distribution, teaching, and giving support of technologies at their facilities.

22. SELECT Power Systems

SELECT Power Systems is a certified small and women owned firm with a national presence that offers specialized engineering, design and management solutions for the ever-evolving utility industry. It provides end-to-end and a la carte services with solutions tailored to address clients' specific challenges. This company provides services in relation to electrical engineering, civil engineering, transmission and distribution line engineering, planning and design services, project management and other.

23. Telecorp LLC

ICT and Clean Technology Trade Mission

Founded in 2009, Telecorp LLC implements an innovative approach to providing development solutions for web and mobile applications, ICT solutions and SaaS architecture solutions. Telecorp LLC provides a wide range of IT services such as UX & UI design, web development, mobile apps, white label fitness apps, digital marketing, paid advertisement, search engine optimization, social media, maintenance, development consulting and other.

24. UGT Renewables

Urban Green Technologies LLC (UGT) is an established utility-scale solar developer based in the U.S. With the combined strength of knowledge and resources, UGT efficiently leads the development, installation, financing, operation and maintenance of solar renewable energy development and ensures the timely completion of projects within program guidelines. UGT has partnered with leading utility companies, investment funds, EPC, technology manufacturers, financial institutions and other leading entities engaged in renewable energy business.

25. VM Ware

VMware is a leading provider of multi-cloud services for all apps. As the trusted foundation to accelerate innovation, our software gives businesses the freedom and flexibility they need to build the future. With VMware Cross-Cloud™ services, customers experience multi-cloud autonomy and consistent operations while delivering a more secure, frictionless employee experience and retaining enterprise control
