FTC B&H CAN OFFER YOU: Information on Bosnia & Herzegovina Market; Discovery of the products on offer; Location of the best suppliers; Identification of the production capabilities and contact of companies; Organization of company visits; B2B meetings; Branch associations covering entire territory of Bosnia and Herzegovina; Analysis of specific economic branches including measures for improvement and development of their performances; Presentations at trade fairs and exhibitions, organization of workshops; Foreign trade statistics by countries and by goods; Exporters' directory; Analysis, information and advisory regarding the macroeconomic situation, trends and expectations, business environment, economic legislation, international agreements (CEFTA 2006, SAA, WTO) and other relevant issues; Professional education programs for entrepreneurs; Issuing of TIR Carnets and ATA Carnets; Transport and communication; Publications, leaflets-presentation of the companies; Arbitration court; Services through Enterprise Europe Network-Provision of information on programs and projects of European Union.

BOJO-METAL Ltd.

Who we are

Founded back in 1985 by Nikica Bojo as a private company called Machining Shop "INDEX". The company was exclusively engaged in the manufacture of parts on different type of machines and metal processing.

Since 2011 company operates under the name "BOJO-METAL" d.o.o. and currently has 60 employee.

Total of 4.000 square meters production area, administrative building of 800 square meters, total ground 35.000 square meters.

What we do

The company is exclusively engaged in the production of parts on different types of machines and metal processing.

Equipment: CNC lathe and state-of-the-art milling machine

Our advantage is customization for quality.

Milling/grinding/turning and other machining of metal parts and other materials.

EMERUS Ltd.

Who we are

Emerus is a European manufacturer of extruded aluminium profiles for various industries. With us you get all important production services from a single source: extrusion (1800 and 2500 T thrust force), powder coating (All RAL Chart Colors), anodizing, machining (milling, sawing, drilling, turning), thermal break, packaging according to your specifications and technical support throughout the production process. Based on ISO 9001, EN 15088 and IATF certificates' requirements and procedures, quality control processes are aligned with production process and customer specifications.

ISO 14025; EPD; EN 15088

What we do

- Precise aluminium extruding
- CAD design, project planning
- 3D prototyping
- Anodizing
- Mechanical pre-anodizing treatment
- Surface treatment (full range of coating and powder colors; sublimation in wood decor)
- Custom manufacturing
- Quality testing, analysis and assurance
- Automated packaging and customized packaging according to client's specific needs
- Logistics for material handling and transportation for global delivery

COMMUTATORS

Starter Motors

No. 1 Market Share
In use for high number of cycles up to 500,000 cycles
Finished an insulation as molded
Single bar design with strong anchoring

Auxiliary Motors

High performance due to Cu bar anchoring design
Target performance through different Cu bar anchoring and different molding compound
Large diversity of different types in production

Household Appliance Motors Industrial Motors & Power Tools

2M and HBN technology for high demands (up to 5 brush sets possible)
Stamped hook technology
Wide range of applications

ELECTRONICS & DRIVES

Electrical motor parts

Motor housing
Shafts

MAGNETICS

Inductive Components

Sensing
DC/DC transformation
Antennas

Inductive components are an important element of electronic sub-systems and contain ferrite cores – mostly of proper production.

Ferrite cores

The production program is reflected in wide range of different ferrite materials and shapes. Ferrite materials area is divided in four main groups: high frequency, low loss, high permeability and power materials.

HYBRID COMPONENTS

Electrical motor connectors for electrical drives & alternators

Power connection of BLDC (EC) stators,
Slip rings

Who we are

Kolektor CCL d.o.o. Laktaši is a company within the Kolektor Mobility Group, a well-established Slovenian concern. The company is known for its reputation for credibility, trustworthiness, quality, and innovative products and services. This reputation has been built over the years, and is considered to be one of the leading and dependable suppliers in Bosnia and Herzegovina for the automotive industry.

What we do

Our primary focus lies in manufacturing electrical components for both the automotive and hand tools industries, specializing in the production of commutators, inductive components, ferrite cores, shafts, and motor housings. Additionally, we excel in crafting precision tools and machines.

Bosch, Denso, Hella, IFM, Hilti, Ametek

MY COMPONENTS Ltd.

Who we are

My Components d.o.o. is a Bosnian company, headquartered in Sarajevo, which specializes in plastic production and injection molding. The components are mainly produced for the economic branch of furniture production as well as several other economic branches. The company has recorded rapid and stable growth during 2022 and 2023 when many European companies moved supply from far East countries to Europe, where we manage to maintain competitiveness.

One of our advantages is that we have regular weekly shipments and a fully integrated system of delivering goods to the EU countries (Sweden, Germany, Italy), on a weekly basis.

What we do

We produce high quality products with a developed awareness of sustainability and recycling. 99.9% of production waste is recycled and used again in production, i.e. in products that allow it. In this way we minimize our impact on environmental pollution.

Accordingly, packaging that we use for our products is made from recycled materials.

References / main customers

Customers throughout Scandinavia and Europe cover 95% of our turnover such as Conform Collection AB and Furninova AB, as well as domestic customers in Bosnia and Herzegovina such as Export City d.o.o.

SIK MOSTAR Ltd.

Who we are

The company SIK d.o.o. Mostar is a privately owned production and service company founded in 1995. From the first small steps taken in a small workshop, to a company mainly focused on the American and European markets (gross production is 100% exported). Since its establishment, it has grown more and more, so that currently in 2023, we have reached a remarkable number of almost 228 employees (more than 203 employees in production and 12 engineers). The current production facilities cover 9,500 square meters. The current monthly volume of production is 480 t. We are in the process of increasing and by the 3rd quarter of 2024 we will be bigger by 5000 square meters.

What we do

A key supplier for most of our metal fabrication customers. From small parts (few kilograms), up to 13 m long welded parts and 6 m long machined parts; separate parts and small series production. All types of cutting: plasma, laser and water jet. We have 60 certified welders, 50 assemblers, 70 employers in the departments in machining, wet painting, heat treatment, transport and also 12 engineers with many years of experience in industry.

References/main customers:

Skeletons of the CNC machines, specialised steel connections units for electro cables, separate parts for steel producers, housings for gear boxes, skeletons and other parts for machines for paper industry, etc.
